Introduction

On February 28, 2025, the City of Port Colborne launched a comprehensive public engagement campaign to collect public feedback on a proposed project to dredge at the Sugarloaf Marina and public boat launch.

The campaign included:

1. Online Survey
2. Paper Survey
3. Drop-in style open houses

This document surveys as a summary of the results of the engagement activities.

Please note that personal information collected during this public engagement project was collected under the authority of the *Municipal Act, 2001* and will be used to help Council make decisions related to a proposed Sugarloaf Marina and public boat launch dredging project in Port Colborne. The disclosure of this information is governed by the Municipal Freedom of Information and Protection of Privacy Act. Questions related to the collection of this information may be directed to the Deputy City Clerk at 905-228-8118 or deputyclerk@portcolborne.ca

Survey

Overview

As one of the largest municipally owned and operated marinas in Ontario, Sugarloaf Marina provides 700 dock slips for both seasonal and transient boaters. Its operations include the public boat ramp that provides access to Lake Erie.

The in-water area near Sugarloaf Marina and the public boat launch is becoming shallower every year due to the accumulation of sediment, silt, and sand. To fix this issue, a dredging project is being considered to create more depth in this area. At this time, the City is asking the public for their input on the possibility of conducting dredging at the public boat launch area and marina. The survey was designed to gather feedback from residents on the proposed dredging project, including:

- If the dredging project should move forward
- How the dredging project should be funded
- Where the dredged material should be disposed of
- The future of the Sugarloaf Marina site in general

The survey was distributed online and in paper format.

The survey was launched February 28, 2025, and closed March 21, 2025. The survey was promoted through multiple channels to maximize reach and participation. These

included the City's website, social media platforms, digital advertising, and media outreach.

Paper surveys were available at City Hall, Vale Health & Wellness Centre and Port Colborne Public Library.

Residents were also invited to two drop-in style open houses, which took place March 5, 2025 from 2 to 6 p.m. and March 6, 2025 from 3 to 7 p.m.

This document summarizes results and feedback gathered from both the surveys and open houses.

Quick Facts

- 354 surveys were completed (304 online and 50 paper)
 - City Hall: 8
 - Port Colborne Public Library: 7
 - Vale Health and Wellness Centre: 29
 - Open houses: 6
- 529 open-field comments to analyze and categorize
- Average time to complete the survey: 8 minutes (online survey)
- Estimated completion rate: 79% (online survey)

Overall Survey Observations

Agreement that dredging is required

- 75% of respondents support the dredging project
- 81.5% of respondents find there are too many weeds getting caught in their boat propellers at the boat launch
- 51% of respondents find the boat launch is too shallow

Love of marina and waterfront areas

- 74% of respondents believe the Sugarloaf Marina provides value to Port Colborne residents
- 60% of respondents would like to see expanded services at the marina
- 73% of respondents do not support the sale of the marina or boat ramp to a private developer. If the data is filtered to only consider respondents who said they were from Port Colborne, 71% do not support selling the marina.

Concern about raising property taxes for development and funding

- 80% of respondents would prefer funding for this project to come from upper levels of government

- Some respondents believe the costs should not be passed on to taxpayers, especially ones who do not use the marina

In-Person Open Houses

Overview

Two drop-in style in-person open houses were held at the Vale Health & Wellness Centre in the Golden Puck Room. The sessions were on:

- Wednesday, March 5 from 2 p.m. to 6 p.m.
- Thursday, March 6 from 3 p.m. to 7 p.m.
- A total of 94 people attended the open houses

A variety of information boards with photos and question prompts were displayed around the room, encouraging conversation and discussion with attendees.

Staff were available to answer questions about the process and potential cost of dredging. Staff also provided answers about potential development opportunities and recorded comments and suggestions from residents.

Two interactive stations were available. One board asked residents to use a sticky dot to select their preferred option for where dredged material should be disposed of. This board did not receive much interaction, demonstrating that residents are unsure of what they consider the best option.

The second interactive board asked residents to use a sticky dot to select their top four priorities if there were to be development on the marina property. The most common response was that residents do not support developing the marina property.

Overall Open House Observations

Overall, there was agreement that dredging is required for both the marina and the boat ramp, but there was a sense of reservation from some attendees.

A variety of comments and concerns were collected. These included, but were not limited to:

- Creating more shore fishing opportunities around the marina
- Dealing with weeds in the marina and boat launch area, as they are causing a problem for boat owners who can't effectively launch their boats or leave their slips
- Leaving the lagoon as-is for environmental and community use reasons
- Repairing the break wall so it can be used by residents

Summary of Survey Results by Question

Responses to survey questions are outlined below. Open-ended questions include a summary of the responses received. A full list of open-ended responses received has been posted on www.portcolborne.ca/marinadredging

Please note, staff used Microsoft CoPilot to help provide summaries and detect trends in the 529 open-ended responses received

Q1. Where do you live?

Answered 155
Skipped 199

Question 22 was an open-ended question which allowed respondents to fill in comments. 155 comments were provided.

A full list of comments is available at www.portcolborne.ca/marinadredging

Overall, respondents agreed that some maintenance improvements are required at the marina. The suggestions are aimed at enhancing user experience, maintaining the marina's facilities and promoting community engagement. A summary of the comments is shown below.

Q22 Open-Ended Response Summary	
Facilities and Amenities	<ul style="list-style-type: none"> • Many respondents suggested installing or improving fish cleaning stations. • There is a strong demand for year-round washroom facilities. • Respondents believe additional parking spaces are needed, especially during peak times or events. • Several comments mentioned the desire for a promenade or pier to enhance lake views and provide better access for non-boaters. • Some respondents made suggestions for better access points for kayaks and canoes, including areas with rubber mats or sand pads.
Maintenance and Cleanliness	<ul style="list-style-type: none"> • Commenters agree that the marina needs dredging to improve water quality and access. • Respondents also agree that many docks are in poor condition and require repairs. • Respondents suggest that regular cleaning of docks, especially to remove bird droppings and weeds, is needed.

Q22 Open-Ended Response Summary	
	<ul style="list-style-type: none"> • Respondents would like to see more efficient use of resources and policy adherence.
Recreational Opportunities	<ul style="list-style-type: none"> • Respondents request expanded shoreline fishing opportunities while preserving natural habitats. • More walking trails and seating areas along the water were requested. • Suggestions were made for more community activities and events, including food trucks and entertainment.

Q23. Is there anything else you would like to share with us about potential dredging at the Sugarloaf Marina and public boat launch?

Answered 116
Skipped 238

Question 23 was an open-ended question which allowed respondents to fill in comments. 116 comments were provided.

A full list of comments is available at www.portcolborne.ca/marinadredging

Overall, there is a mix of comments from respondents, with recognition of the need for dredging, but concern for increased cost to the taxpayer. Concern for losing the marina to a private developer is also mentioned. A summary of the comments is shown below.

Q23 Open-Ended Response Summary	
Financial Concerns	<ul style="list-style-type: none"> • Many commenters are worried about the cost of dredging and oppose raising taxes to fund the project. • Suggestions include finding alternative funding methods, such as fundraising, grants or charging marina users higher fees.
Environmental Impact	<ul style="list-style-type: none"> • Concerns were raised about the environmental effects of dredging, particularly on local wildlife and the lagoon. • Commenters would like to see the project done with environmentally safe practices and long-term impacts in mind.
Maintenance and Infrastructure	<ul style="list-style-type: none"> • Commenters highlight the need for regular maintenance to prevent issues from escalating.
Community and Usage	<ul style="list-style-type: none"> • The marina is seen as a valuable asset to the community, attracting visitors and providing recreational opportunities. • There are suggestions to improve facilities and services to make the marina more welcoming and accessible to everyone.
Alternative Solutions	<ul style="list-style-type: none"> • Ideas include selling the marina to a private developer, relocating the boat

Q23 Open-Ended Response Summary	
	<p>ramp, or using innovative dredging methods.</p> <ul style="list-style-type: none">• Some commenters propose using the dredged material for other purposes, such as creating barriers or filling in areas.
